Version 1.5 (28.Feb.09)

Introduction :

Welcome to competitionMod. A unified ruleset war mod for Call of Duty: World at War.

comMod started life as a modification of Promod to allow hardcore mode. Since those humble beginnings it has gone on to become a war mod in its own right with many features added that have been requested by the CoD:WW community.

With custom weapon select menus, softcore & hardcore modes, many gametypes supported, 1v1 and 2v2 modes, low client size downloads, weapon balancing and much more it makes comMod the premium in unified ruleset war mods for CoD:WW!

Installation :

Upload **z_v15_commod.iwd**, **z_svr_v15_commod.iwd** & **mod.ff** to a folder called "commodv15" within your "mods" folder.

Call the directory from your command line.

For redirects, only the files **z_v15_commod.iwd** & **mod.ff** need to be hosted at your redirect space.

Mode Usage :

Mode usage SD:-

Softcore
/rcon commod_mode private_xx (eg, private_10, private_12) [War Mode]
/rcon commod_mode public_xx (eg, public_10, public_12) [Public Mode]

Hardcore
/rcon commod_mode privatehc_xx (eg, privatehc_10, privatehc_12) [War Mode]
/rcon commod_mode publichc_xx (eg, publichc_10, publichc_12) [Public Mode]

2v2
/rcon commod_mode 2v2_xx (eg, 2v2_10, 2v2_12) [2v2 War Mode]
/rcon commod_mode 2v2hc_xx (eg, 2v2hc_10, 2v2hc_12) [2v2 Hardcore War Mode]

1v1
/rcon commod_mode 1v1_xx (eg, 1v1_10, 1v1_12) [1v1 War Mode]
/rcon commod_mode 1v1hc_xx (eg, 1v1hc_10, 1v1hc_12) [1v1 Hardcore War Mode]

For all SD modes please make sure the server is in SD mode before issuing one of the above commands, with g_gametype SD

CTF, HQ, TDM, DOM & SAB

You have the ability to control the roundtime of CTF, HQ, TDM, DOM & SAB modes in both private (match) and public modes.

For public modes the timelimits will follow those set in your server.cfg so make sure the following are set to your requirements as the mod will use these as the time settings for the mentioned gametypes :-

HQ - scr_koth_timelimit "x"
TDM - scr_tdm_timelimit "x"
CTF - scr_ctf_timelimit "x"
DOM - scr_dom_timelimit "x"
SAB - scr_sab_timelimit "x"

For private (match) modes the timelimits can now be set via console using the commod_mode private_XX command.

Firstly you should make sure the server is in the required gametype mode by issuing one of the following commands via console :-

[Capture The Flag] /rcon g_gametype ctf
[Headquarters] /rcon g_gametype koth
[Team Deathmatch] /rcon g_gametype tdm
[Domination] /rcon g_gametype dom
[Sabotage] /rcon g_gametype sab

You will then need to reload the current map with /rcon map mp_*mapname*

You can now set the timelimit of each side (2 sides by default [4 for SAB]) of the map by using the following commands :-

Softcore
/rcon commod_mode private_xx (eg, private_10, private_15) [War Mode]

Hardcore
/rcon commod_mode privatehc_xx (eg, privatehc_10, privatehc_15) [War Mode]

2v2
/rcon commod_mode 2v2_xx (eg, 2v2_10, 2v2_15) [2v2 War Mode]
/rcon commod_mode 2v2hc_xx (eg, 2v2hc_10, 2v2hc_15) [2v2 Hardcore War Mode]

1v1
/rcon commod_mode 1v1_xx (eg, 1v1_10, 1v1_15) [1v1 War Mode]
/rcon commod_mode 1v1hc_xx (eg, 1v1hc_10, 1v1hc_15) [1v1 Hardcore War Mode]

Rifles Only
Rifles only mode can be used in conjunction with any other mode, public, private, 2v2, CTF, TDM, etc.

To activate Rifles only mode you need to add a space and the word "rifles" to the end of any mode your choose.

eg;
/rcon commod_mode 2v2 rifles
/rcon commod_mode public_10 rifles
/rcon commod_mode private12 rifles

This mode will allow the selection of only bolt & semi rifles, no other weapons will be selectable.

Quick Menu :

Within the voice command quick menu there is a comMod menu, accessable by default by pressing the 'B' key and then option '4' ingame.

In this are three new options, Call Timeout, Suicide and Drop Bomb. These are mostly used for Search & Destroy but the suicide option can be used in any gametype.

Each team has 3 timeouts which last 5 minutes. In timeout mode it is possible to carry on killing but all scores will be stored and replace once the match resumes, after either 5 minutes or when every player presses ready up.

Player Options :

It is possible for players to control their own FoV, Max FPS, Max Packets and enable/disable items like drawring FPS and Lagometer. This can be achieved by ingame by accessing the comMod Advanced options. This is possible by pressing ESC -> Click Options -> Click Multiplayer Options -> See bottom right hand corner.

Please make sure that your settings stay within the league rules you are playing.

Debranding Your Server :

It is always handy to have the CM 1.5| branding at the start of your server hostname, especially for public servers where people will actively search out comMod servers to play on. If you wish to remove this branding then it is possible by adding the following line to your server.cfg :-

set commod_nobranding 1

Known Bugs :

Sniper Bug - When holding breath scope zooms out.
Fix - Bind Sprint & Breath to seperate keys, sprint on one and hold breath on another.

mod.ff Bug - COD:WW does not download the new mod.ff and uses the old versions.
Fix - Delete mod.ff from local folders (ie, C:\Documents and Settings\XXXX\Local Settings\Application Data\Activision\CoDWaW\mods\ComMod)

Kick Bug - Players are kicked at map change for invalid .iwd
Fix - Rename the comMod folder on your server to something unique, eg. comMod_clanname

Impure Client - Player kicked for "Impure Client Detected, Invalid .iwd files referenced"

Client Fix - Delete local mods/comMod_xxxx folder for the server you are connecting to, can be found at the following locations

XP : C:\Documents and Settings**username**\Local Settings\Application Data\Activision \CoDWaW\mods\
Vista : C:\Users**username**\AppData\Local\Activision\CoDWaW\mods\

Sniper/Shotgun Bug - Sniper or Shotgun becomes unselectable even though no one on the team has it
Fix - Move to spectator and back to your team.

Test Server :

Why not try the public comMod test server, always running the latest version. Give it a try,

78.129.202.14:28970

Currently running in mixed Softcore Public mode.

Credits :

comMod created by **datLicht**, **England4eva** ('e4E.) & **Phoenix**

Major credit goes to **Ryan 'raf1' Palmer** who created the original Promod in which this mod is built on top of. Without him and his team of talented guys this mod would never be possible.
